

Name: Xingyou Song
Student ID number: 25396784
Email address: xsong@berkeley.edu

Who is your primary TA (i.e. the person who should assign your participation grade)?
Anna Papito (mainly because she is my DIS leader)

Are there other TAs (or the instructor) with whom you've interacted frequently? Your primary TA may consult them for help in assigning your grade.
Steven Bi, William Vaneck

Please fill out the following sections as accurately and honestly as you can. Remember: it is not necessary to have participated in all of these ways, e.g. someone who posts a lot on Piazza but does nothing else may still earn full participation points. Please give us as much information as possible so we can give you the grade you deserve.

Lecture: Did you attend often/always? Did you ask relevant questions? Give examples.
Not often. I have 2 other classes (61A, 61C), so there wasn't always time (scheduling conflicts).

Discussion section: Did you attend often/always? Did you ask relevant questions? Give examples.

For the first few discussions, I went to whatever times were available (again, some scheduling conflicts). I helped a few students with their homework/questions, but as the summer went on, there was less time to attend.

Office hours/homework party: Did you attend often? What did you do while you were there? Did you work alone or with others? Give any memorable examples.

I went to the first few homework parties. I tried socializing with some people, as well as help a few people with their homework. I went to a few office hours just to see what was happening; because it was too crowded, I didn't go in the later weeks.

Piazza: How often do you post? Were you asking questions or answering them (both are good!)? Did you post course-related content/links? Please tell us about your posts that you think were your greatest contribution (e.g. top 5; screenshots with URL are OK).

Work with others outside of class: If you had any outstanding experiences with other students (e.g. organized your own mini-HW party), please mention them here.

I've helped my friend (Peng Yi) many times outside of class, because we live in the same dorms. She also had a few friends who I worked with.

Other: If there's anything we missed with the above questions, please mention it here.

I created the Mock Exam 4, designed to introduce some beautiful and famous math theorems using relevant coursework, which I think was a benefit. Also, I talked with a few TA's/readers about Berkeley Math Tournament, etc.
